

Incident and Hazard Reporting Procedure

Section 1 - Background

(1) ACU is committed to complying with its legal obligations associated with maintaining a register of injuries, and effectively managing reported incidents and hazards which occur within on or off-campus working and learning environments.

(2) Staff members, students, visitors, volunteers, and contractors participate and contribute to the identification and management of work health and safety (WHS) risks within the working and learning environment. Reporting incidents and hazards, within [Riskware](#), is a critical component of these WHS risk identification processes. Relevant supervisors and other officers of the University review the reports logged and develop Action Plans and associated treatments or corrective actions.

(3) These reports can be logged by staff and students on behalf of others.

Section 2 - Definitions

(4) In this Procedure, the following terms are used as defined:

Term	Explanation
Action Plans	Action Plans are documented within ACU's incident and hazard reporting database, Riskware . A Riskware Action Plan would typically include treatments (controls / corrective actions) and timelines for managing the risks which are associated with reports of incidents or hazards.
Control Measures	Control measures include actions that can be taken to reduce the potential of exposure to the hazard, or the control measure could be to remove the hazard or to reduce the likelihood of the risk of the exposure to that hazard being realised.
Corrective Actions	Corrective action (inclusive of preventive action) is an action taken to correct a health and safety related problem or potential problem, and to prevent, as far as it is practical, a recurrence.
Hazard	A hazard is anything within the working and learning environment that has the potential to harm people, property, or the environment.
Hierarchy of Control	The Hierarchy of Control provides a basic guide for controlling hazards in the workplace. The hierarchy should be referenced whenever treatments are developed.
Injury	Any physical or mental damage to the body caused by exposure to a hazard.
Notifiable incident	A notifiable incident is any of the following which is required to be notified to the relevant statutory authority within a specified timeframe: 1. the death of a person, or 2. a serious injury or illness of a person, or 3. a dangerous incident.
Officers	People who make decisions, or participate in making decisions that affect the whole, or a substantial part, of a business or undertaking. It is a requirement of WHS legislation that any officer of an organisation must exercise due diligence to ensure that the organisation complies with its health and safety duties. They must ensure that the organisation has appropriate systems of work in place, and they must actively monitor and evaluate health and safety management within the organisation.

Term	Explanation
Risk Rating	Rates the level of risk of the incident or hazard taking into consideration the possible consequences of someone being exposed to an incident and the likelihood of this occurring.
Serious injury or illness	<p>An injury or illness requiring the person to have immediate treatment as an inpatient in hospital. Serious incidents, as defined by WHS regulators, also include amputations, serious burns, and head or eye injuries.</p> <p>Immediate treatment for:</p> <ul style="list-style-type: none"> • The separation of the person's skin from the underlying tissue • a spinal injury • the loss of a bodily function • serious lacerations • medical treatment within 48 hours of exposure to a substance or a prescribed serious illness.
Treatments	Implement both existing and future treatments to prevent and / or mitigate the risk.
Workplace incidents	Any incident resulting in a work injury, work caused illness or dangerous event.
Work Illness	An illness or exacerbation of an illness to which work, a workplace, a workplace activity or specified high risk plant was a significant contributing factor.

Section 3 - Roles and Responsibilities

(5) Reports of incidents (including injuries, work and learning-related illnesses and 'near misses') and hazards in [Riskware](#) are investigated or assessed by nominated supervisors or other relevant University staff, who are accountable for developing and recording [Riskware](#) Action Plans and associated treatments or corrective actions to manage these risks.

Part A - Staff Members, Students, Volunteers, Visitors and Contractors

(6) All members of the ACU community are actively involved in managing risk and [log reports of incidents and hazards](#) about themselves and other people. These reports are entered into [Riskware](#).

- Whenever a staff member submits a report about an incident and hazard, the relevant nominated supervisor receives an automated email that provides guidance about developing a [Riskware](#) Action Plan. The plan should include the details of the treatments or corrective actions which are associated with managing the identified risks within the report.
- Whenever a staff member logs a report on behalf of another staff member, the report should be assigned to the nominated supervisor of the impacted person.
- Whenever staff report on behalf of a student, volunteer or visitor, the incident or hazard should be assigned to a nominated supervisor or manage who has some oversight over the activity (or space), which is detailed within the report. Whenever this is unclear, the riskware report should be assigned to 'ACU Management' in [Riskware](#) (notification is sent to People and Capability who can reassign the notification to the relevant staff member).
- Whenever a student submits a report about incidents and hazards, or on behalf of another student, the report will be automatically assigned to 'ACU Management' unless the student is aware of who to assign the report to.
- Contractors should engage the relevant work area, who has oversight over the work activity or area, about logging a report.

Nominated Supervisors and Other Relevant Staff

(7) Nominated supervisors and other relevant staff are responsible for ensuring the management of WHS risks, including [Riskware](#) reports.

(8) Nominated supervisors and other relevant staff are responsible for:

- a. reviewing and investigating reports of incidents and hazards;
- b. developing and recording [Riskware](#) Action Plans;
- c. implementing risk treatments (Control Measures and / or Corrective Actions); and
- d. sharing and applying learnings within their work unit to mitigate similar future risks.

Determining Who Will Manage Reports of Incidents and Hazards

(9) Where the report is submitted by a staff member, the staff member's nominated supervisor is responsible for reviewing and managing the report.

(10) Where the report is submitted by a staff member on behalf of another staff member, the report should be reassigned to the affected staff member's nominated supervisor who will review and manage the report.

(11) Relevant supervisors and staff also review and manage reports about student, visitor and contractor activities. These reviews and the development and recording of [Riskware](#) Action Plans (often detailing corrective actions) should be conducted in consultation with the impacted person/s.

Actions to be Taken on Reports of Incidents and Hazards

Review and Investigate

(12) The nominated supervisor or other relevant staff member reviews the report, investigates the incident or hazard, and records the investigation in [Riskware](#) within the Investigation tab.

(13) The nominated supervisor or other relevant staff member assesses the risk and assigns a Risk Rating, which will guide the selection of risk treatments (Control Measures and / or Corrective Actions) to reduce the risk of injury, property damage and / or environmental damage. The scope of an incident investigation is relative to the nature of the incident and the Risk Rating and would typically be broadened in the case of a high Risk Rating.

(14) Some incident investigations may need to be conducted in consultation with subject matter experts such as local facilities management staff, a staff member with relevant expertise, and/or members of the Work Health & Safety team in People and Capability.

(15) The nominated supervisor or other relevant staff member engages other staff members as needed in assessing risk and developing and implementing Action Plans. Refer to [Appendix A: Incident Investigations](#) for more guidance about incident investigations.

(16) Develop and record a [Riskware](#) Action Plan.

(17) The review or investigation should inform the treatments (Control Measures and / or Corrective Actions) that are documented within the [Riskware](#) Action Plan (Action Planning tab) by the nominated supervisor / relevant staff member.

(18) As part of this review, an assessment should be made about whether existing risk treatments have effectively managed the risk.

(19) The selection of effective Control Measures and / or Corrective Actions is made relative to the Risk Rating. The nominated supervisor or other relevant staff member also refers to the Hierarchy of Control (in the [Riskware](#) Action Planning tab) when considering options for managing risk.

(20) In cases of an incident involving illness or injury that affects a staff member's capacity to perform their role, the

nominated supervisor should refer to the [Recovery at Work Program](#) and associated resources. Staff should visit [Service Central](#) for workers compensation support. Students impacted by a university-related injury or illness should contact insurance.finance@acu.edu.au.

Riskware Reference Guides

Implement risk treatments (Control Measures and / or Corrective Actions)

(21) The nominated supervisor / other relevant staff member implements the risk treatments identified in the [Riskware](#) Action Plan. A treatment should only be assigned to another staff member after consulting with that staff member and consensus is reached about actioning the treatment and timing.

Share and Apply Learnings as Appropriate

(22) The nominated supervisor or other relevant staff member identifies learnings from the investigation and the implementation of risk treatments that can be applied within the organisational unit to mitigate similar risks in future.

First Aid Officers

(23) Whenever a First Aid Officer responds to an incident that requires medical attention, the First Aid Officer will support the affected staff member or student to make a report of the incident or injury within [Riskware](#). A First Aid Officer can make a report on behalf of a visitor, volunteer, or contractor.

(24) First Aid Officers may recommend improvements to the way in which the University manages its first aid response. These staff also populate a [First Aid Treatment Record](#) that is uploaded to [Service Central](#).

WHS Committees and Health and Safety Representatives

(25) Each campus WHS Committee, including Health and Safety Representatives, conduct a review of incident and hazard reports and associated treatments at its quarterly meetings to assist the University to assess and manage risk. The Committee considers whether the Corrective Actions taken in response to incidents could be applied more broadly at the local campus or across the University. Health and Safety Representatives (HSRs) may be consulted by staff and supervisors about incidents, hazards, and associated treatments affecting their work group.

Officers of the University (Members of the Senior Executive, the Executive, Senior Management and Management)

(26) Officers of the University are responsible for ensuring that they are knowledgeable about hazards and risks, including those identified through reports of incidents and hazards, and for providing oversight to ensure that risks are eliminated and / or managed in their respective portfolio, organisational area, or unit.

People and Capability

(27) People and Capability:

- a. provides advice to managers and staff about processes for identifying hazards and managing risk;
- b. provides advice to organisational units about reviewing and investigating incidents and hazards within [Riskware](#);
- c. in the case of an incident classified as serious (injury or illness), liaises with Properties and Facilities and other organisational units upon notification of the incident to ensure that the relevant WHS State Regulator is notified. People and Capability participates in investigation meetings, which may be conducted by the WHS State Regulator, and works with organisational units to preserve the site until its reopening by the WHS State Regulator; and

- d. provides procedural guidance on claims for workers' compensation and works with managers and staff to manage periods of absence, consideration of alternative duties, and facilitation of return to work.

Section 4 - Managing the Initial Response to Serious Incidents

(28) In the event of an emergency, the health and safety of any affected person is the overriding priority. First Aid Officers in attendance should remain with any affected people until emergency services support arrives. A report of an incident will be made once it is determined that everyone is safe.

(29) WHS (OHS) state regulators classify a range of incidents as immediately reportable to the regulator. These reportable incidents fall with a classification of Serious Incidents, including Dangerous Incidents or Fatalities.

(30) If a Serious Incident occurs:

- a. emergency services are to be contacted by dialing 000; and
- b. the ACU National Security Centre should also be contacted about the call to emergency services (call 1300 729 453 or 8888, internal phones).

(31) The ACU National Security Centre sends an alert to the Incident Response Group. The Incident Lead then manages the incident in accordance with the [Critical Incident Management Policy](#).

(32) People and Capability is alerted, notifies the WHS State Regulator, and acts as the contact with the Regulator.

(33) First Aid support can be accessed by calling the closest First Aid Officer (see [First Aid Officers to Call for Assistance](#)) or by activating the [Safezone App](#) or calling the ACU National Security Centre on extension 8888 or 1300 729 453 at the time of reporting the Serious Incident.

(34) The site of the incident will be secured and preserved, so that the WHS State Regulator can conduct an investigation.

Section 5 - Records of Incidents and Investigations

(35) Records of all incident reports, investigations, and associated [Riskware](#) Action Plans will be maintained. More comprehensive investigation reports are completed whenever a Serious or Critical Incident occurs. These reports are also uploaded to the relevant [Riskware](#) Action Plan.

Section 6 - Revisions made to this Procedure

(36) The revision table includes revisions up until this document was migrated into the current policy platform. Any later changes will show in the Status and Details tab.

Date	Major, Minor or Editorial	Description
13 January 2023	Minor	The procedure has been simplified. The procedure should be applied in combination with the WHSMS Corrective Actions Procedure.

(37) The University may make changes to this Procedure from time to time to improve its effectiveness. If any staff

member wishes to make any comments about this Procedure, they should forward their suggestions to People and Capability.

Section 7 - Further Assistance

(38) Any staff member who requires assistance in understanding this procedure should first consult their Nominated Supervisor or Manager who is responsible for applying the University's WHSMS within their work area. Should further information or advice be required, staff should visit [Service Central](#).

Section 8 - Associated Information

(39) For related legislation, policies, procedures and guidelines and any supporting resources, please refer to the Associated Information tab.
